ADVANCED FINACIAL  
FEDERAL CREDIT UNION  
CASE STUDY

## MODERN INTERIORS.

Our client Advanced Financial Federal Credit Union was looking to update their outdated branch into something more modernized.

Banks face unique and complex design challenges.

With multiple design workshops we were able to successfully create a design for our client that satisfied the needs and vision they had for their space,

## REFRESH.

We were able to successfully plan and implement designs that adhered to the security and stability requirements dictated by a financial service provider, and gave the space a refreshed look.

We helped design a new space, leaving traditional workplace models behind.

Throughout the process of refreshing and updating this office we were able to successfully capture the modern and updated look our client was looking for, giving the space an entirely new look and feel.

## CAREFULLY CONSIDERED DESIGN

The modern finishes and details give the bank an updated look.

The new office furniture was key to the changing the way our client worked. We selected furniture pieces that didn't only change the look and feel of the space, but also streamlined their work.

The final product creates a professional and beautifully modern first impression.
