

**GRP ADS  
CASE STUDY**

## TRANSFORMING OFFICE SPACES.

Our client GRP ADS had a vision to create a workplace that reflected their fun and sprightly personality.

Their office completely transformed the visitor and employee experience.

During the design process we held workshops to gain a thorough understanding of how they could best utilize their new space.

## REDESIGN.

As a continuously growing tech corporation, they needed our services to create an ideal space centered around the employee and customer experience, as well as activity-based working, and improved collaboration.

GRP ADS design included a designated touch down area to encourage the team to collaborate.

Our design supported their branding identity and upbeat work environment.

## COLORFUL INTERIORS.

Our design offered a mix of professionalism with some playful elements.

As you enter the office you are met with bold colors and modern designs that speak to the personality of the company and the inviting and lively environment of the office.

The unique design was established through multiple workshops.
