

# WIPRO CASE STUDY

## ELEGANT & INNOVATIVE SPACE.

Our client WiPro, a technology company wanted their office to reflect the innovative and creative nature of their business.

As for the aesthetic, they envisioned their new workspace to embody the same look and feel as an art gallery.

Holding multiple workshops with our client we helped refresh the space to something elegant, innovative with the creative edge they were after.

## REFRESH.

As a large tech corporation, they needed our services to create an ideal space with modern interiors.

Throughout the process of refreshing and updating this office we were able to successfully capture their vision for this space.

We helped curate a space that spoke to the modern workplace our client was looking for. We made selections that allowed the colorful abstract art be a main focal point in the space- creating the look and feel of an art gallery.

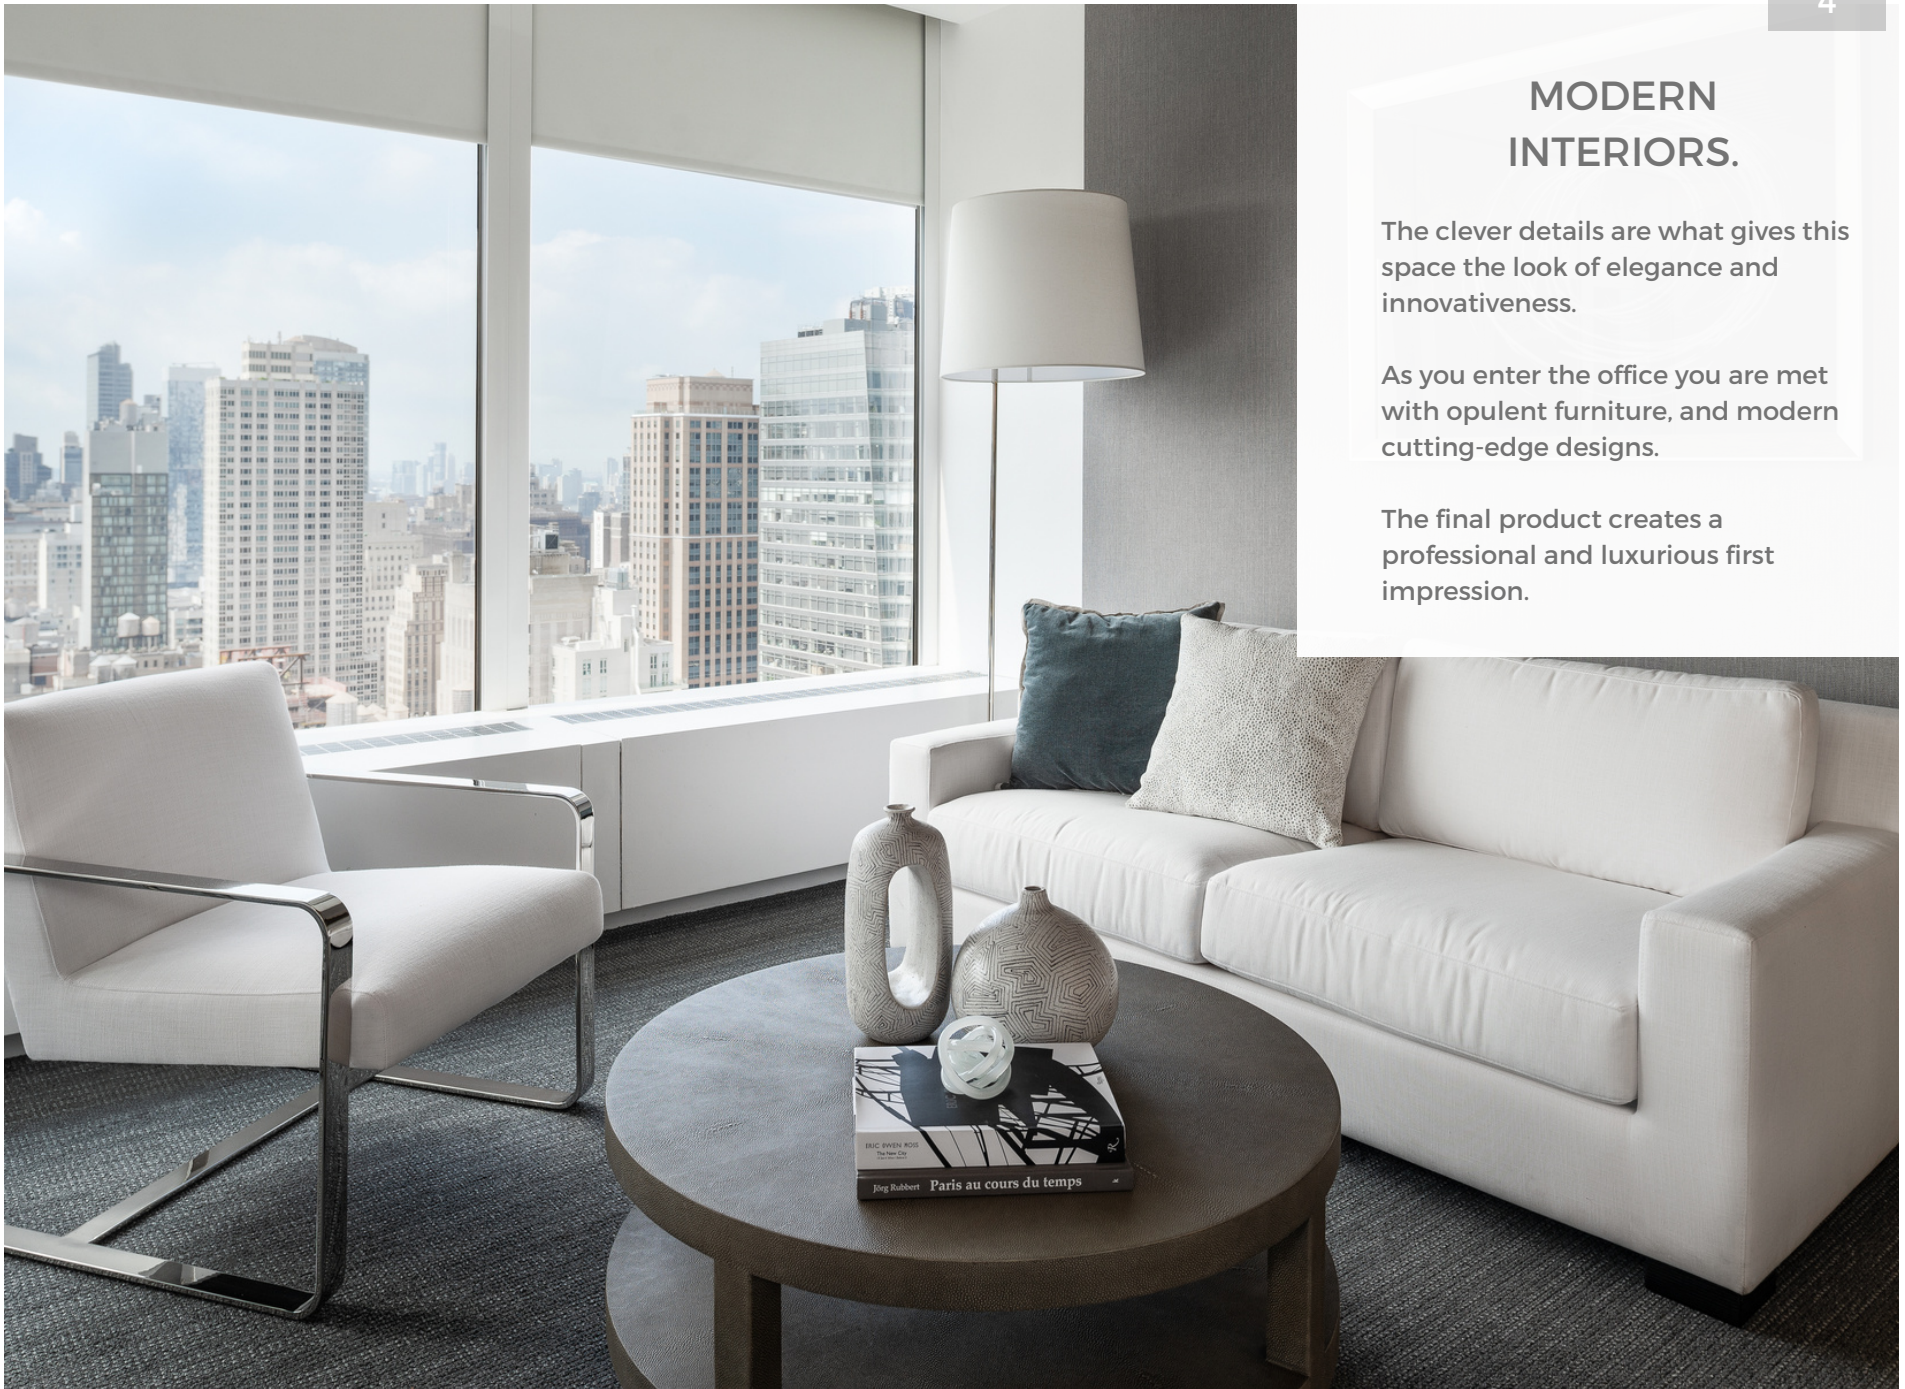

## MODERN INTERIORS.

The clever details are what gives this space the look of elegance and innovativeness.

As you enter the office you are met with opulent furniture, and modern cutting-edge designs.

The final product creates a professional and luxurious first impression.
