

BRUDERER CASE STUDY

ELEVATING SPACES

Our client Bruderer Machinery was looking to modernize and refresh their space.

Our designers aim was to craft a brighter and contemporary environment, prioritizing the client's comfort and productivity.

We carefully selected warm-toned woods and light earth tone colors to establish an atmosphere where they can work and concentrate effectively.

CONNECTION & BRANDING

The chosen colors and materials resonate with the branding of Bruderer Machinery, a deliberate decision made to align with the company's vision and brand identity.

While our intention was to modernize and uplift the space, we also sought to maintain a connection to the raw industrial materials that the employees interact with on a daily basis.

REVITALIZATION

By incorporating natural elements such as biophilic design elements, soft lighting, and earthy color palettes, we aimed to create a space that promotes well-being and connectivity with nature.

The use of ergonomic furniture in this design further enhances the comfort and functionality of the workspace.

Overall, our design of this space has created a lighter and more modern workplace.
