

WATTS WATER TECHNOLOGIES CASE STUDY

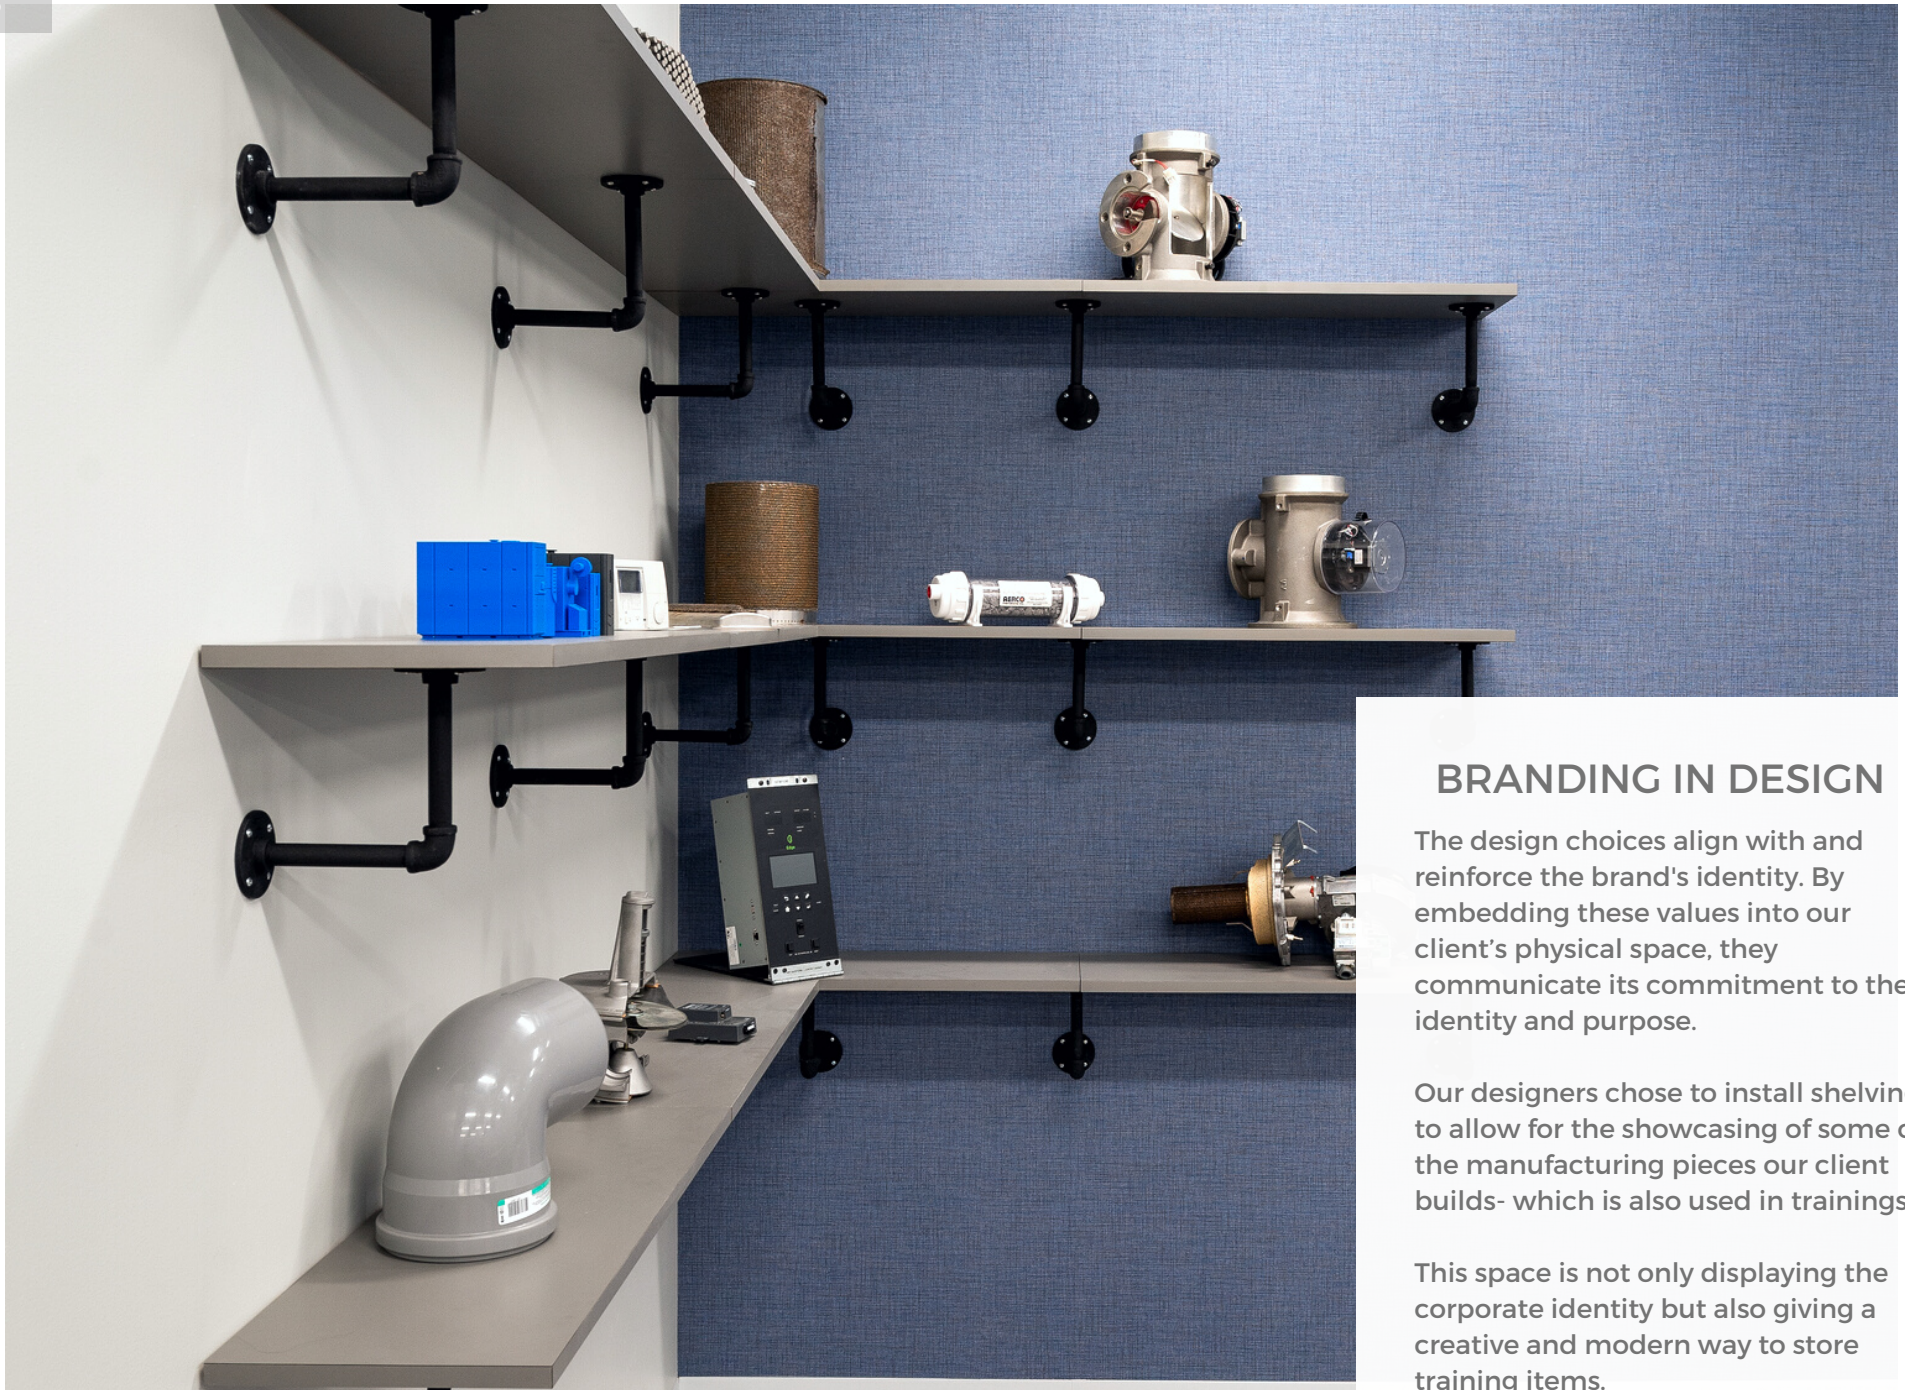

TRAINING ROOM DESIGN

Our client Watts Water Technologies needed a training room space to be revamped, modernized and functional.

Accurate design of training rooms is crucial, as they need to provide comfort and facilitate long periods of concentration.

An essential aspect of establishing an effective training environment is through the use of many design elements from acoustics and flexibility to ergonomic furniture and strategic floor plans.

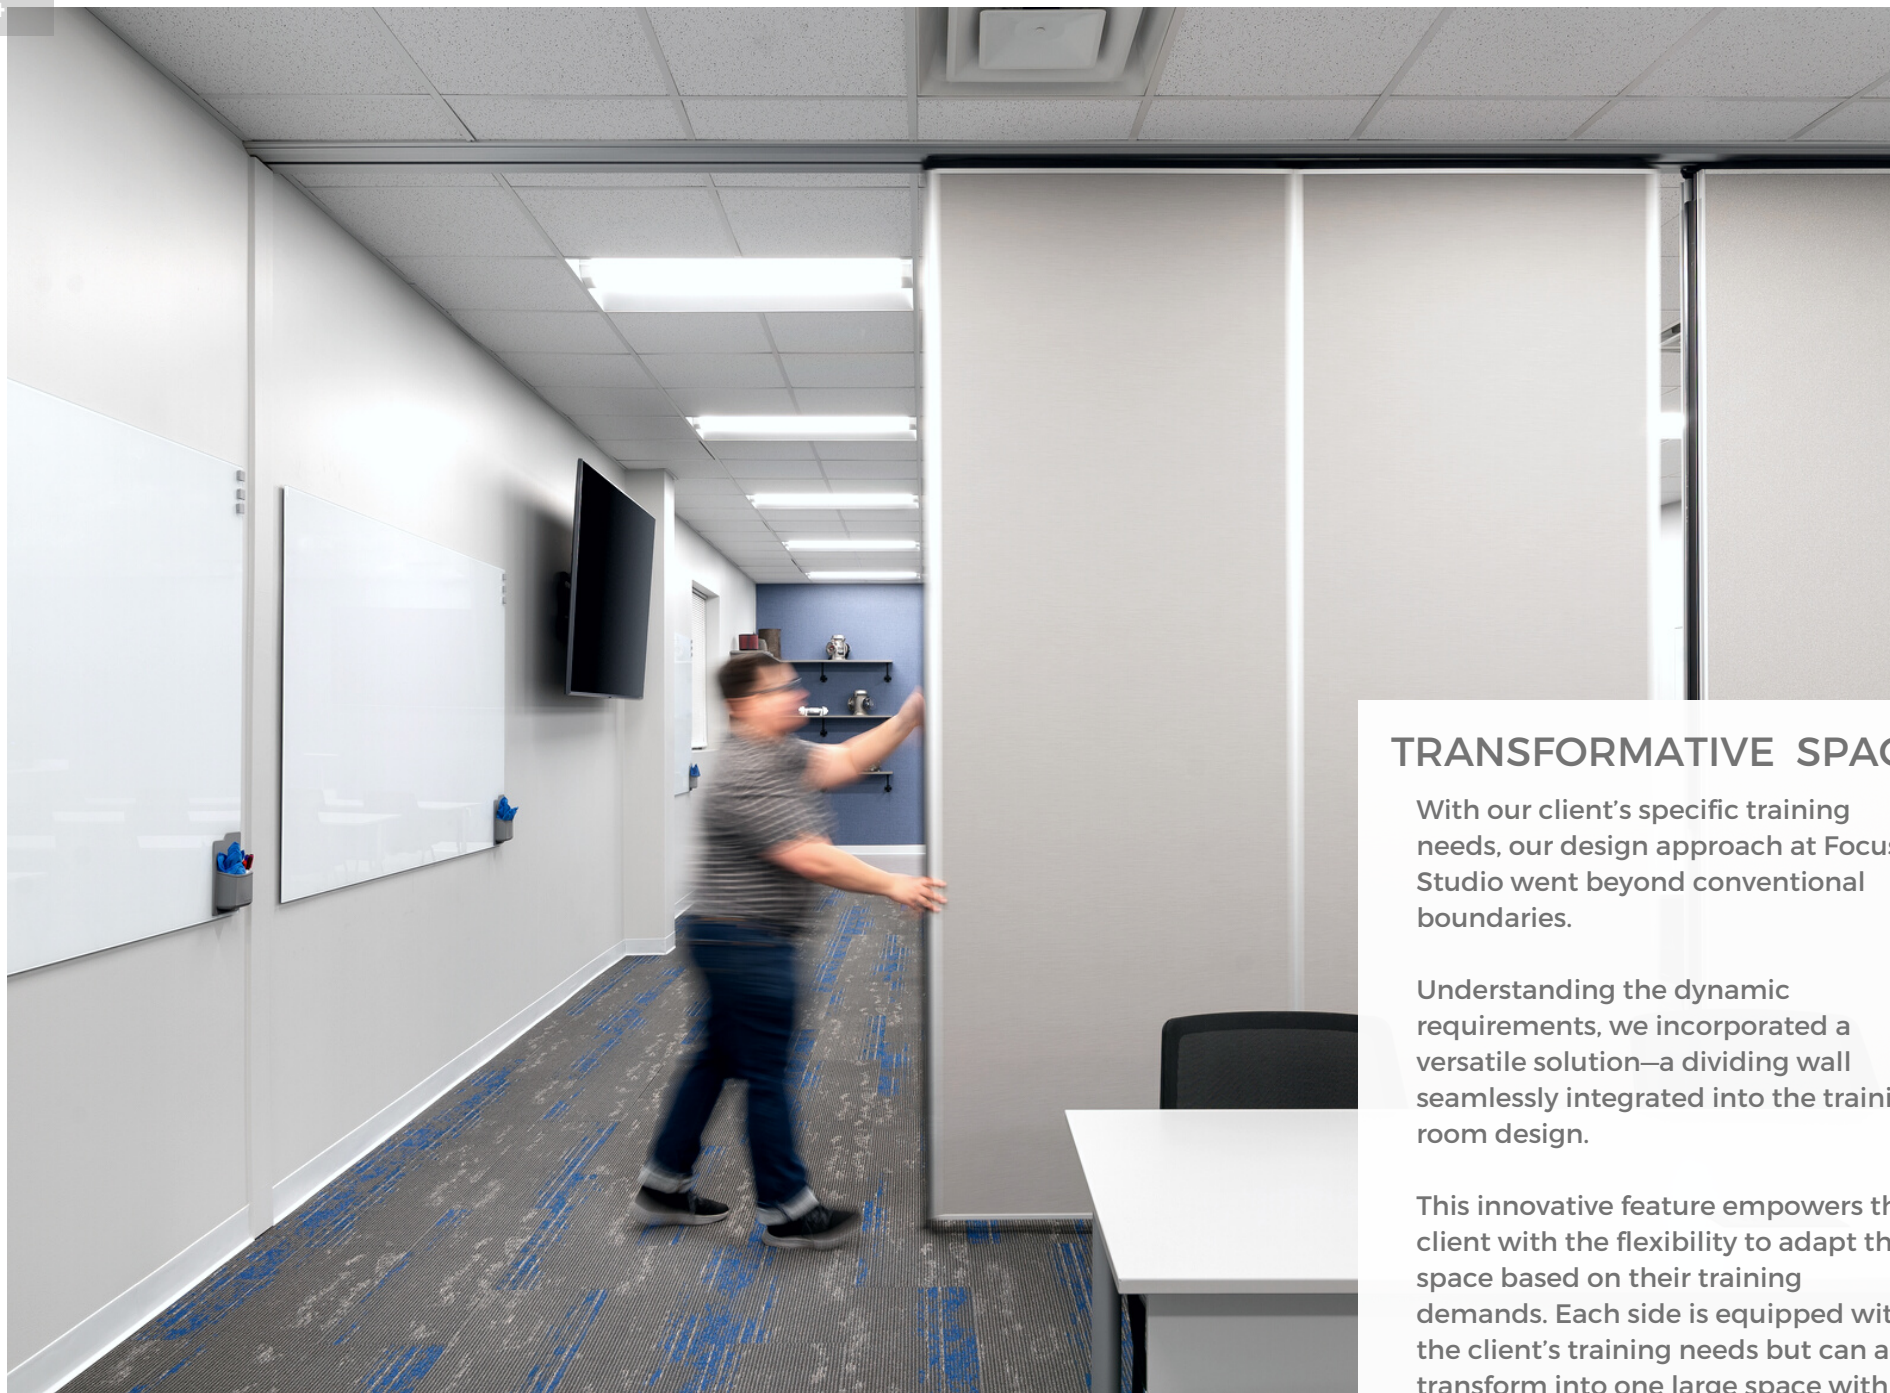

BRANDING IN DESIGN

The design choices align with and reinforce the brand's identity. By embedding these values into our client's physical space, they communicate its commitment to their identity and purpose.

Our designers chose to install shelving to allow for the showcasing of some of the manufacturing pieces our client builds- which is also used in trainings.

This space is not only displaying the corporate identity but also giving a creative and modern way to store training items.

TRANSFORMATIVE SPACE

With our client's specific training needs, our design approach at Focus Studio went beyond conventional boundaries.

Understanding the dynamic requirements, we incorporated a versatile solution—a dividing wall seamlessly integrated into the training room design.

This innovative feature empowers the client with the flexibility to adapt the space based on their training demands. Each side is equipped with the client's training needs but can also transform into one large space with the moving of one wall.

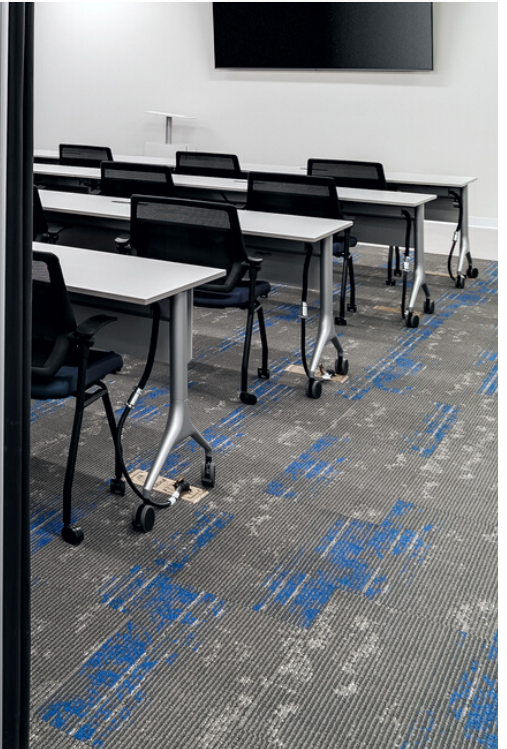

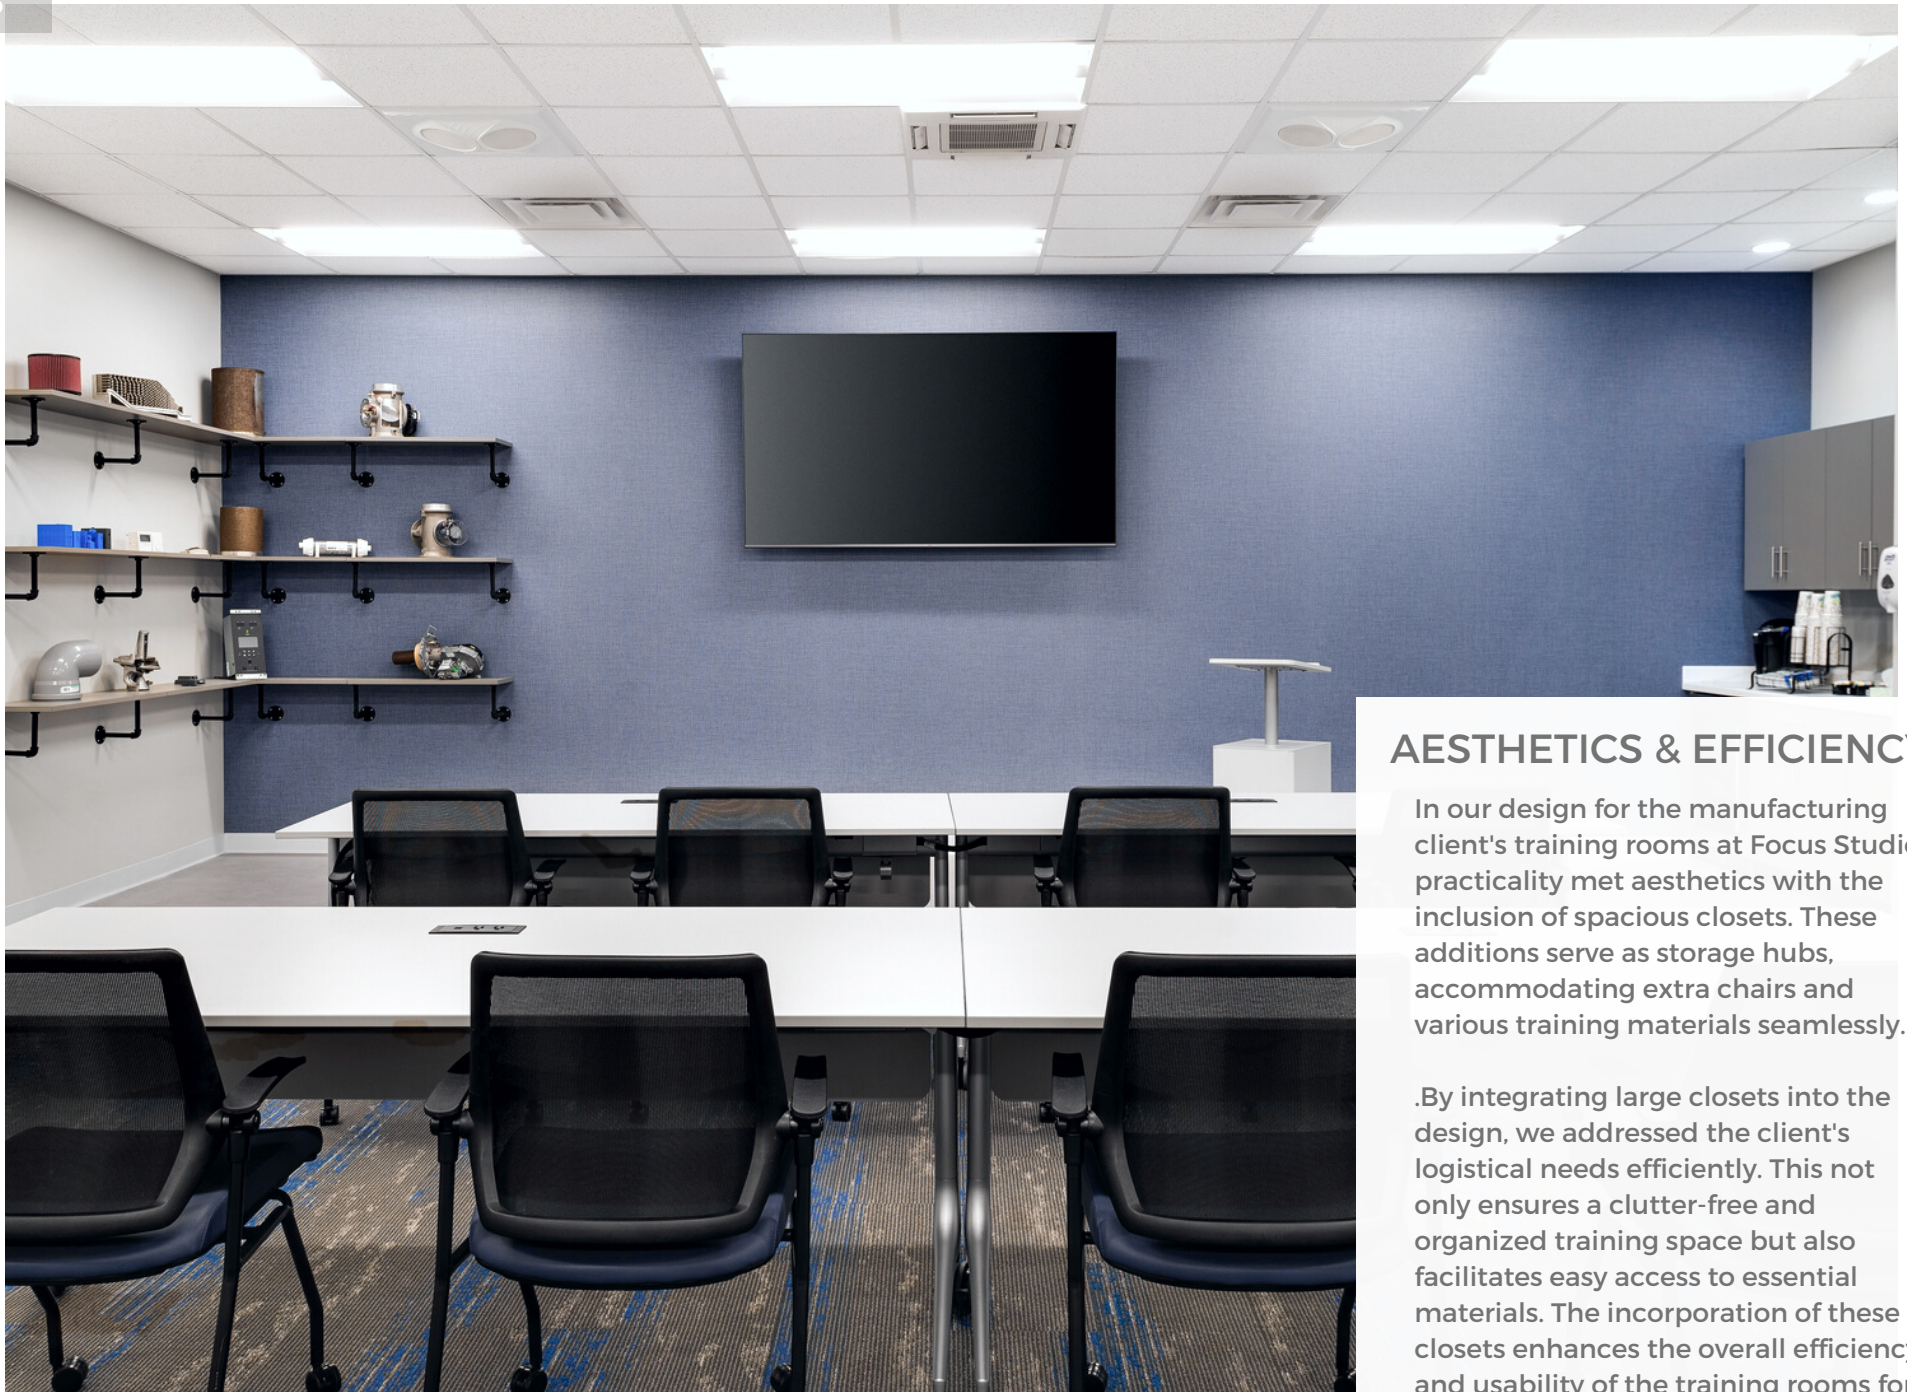

TRAINING OPTIMIZATION

The adjustable dividing wall allows the room to effortlessly transform into two separate entities when required, catering to smaller, focused sessions.

Conversely, for more extensive training programs or collaborative events, the space easily converts into one expansive room.

This thoughtful design not only optimizes the utility of the training area but also reflects our commitment to providing tailored solutions that align with the client's operational objectives.

AESTHETICS & EFFICIENCY

In our design for the manufacturing client's training rooms at Focus Studio, practicality met aesthetics with the inclusion of spacious closets. These additions serve as storage hubs, accommodating extra chairs and various training materials seamlessly.

.By integrating large closets into the design, we addressed the client's logistical needs efficiently. This not only ensures a clutter-free and organized training space but also facilitates easy access to essential materials. The incorporation of these closets enhances the overall efficiency and usability of the training rooms for our valued client.

ADAPTABILITY

In our designs we are always forward-thinking for our clients.

This includes thinking outside the box when it comes to our clients needs.

A normally overlooked aspect of the design of training rooms is the adaptability of the space. This is something we believe is paramount at Focus Studio

To allow for easy adaptability our designers went with a wheeled tables, chairs and even a wheeled podium that can be moved when necessary around the space or when transitioning the space.

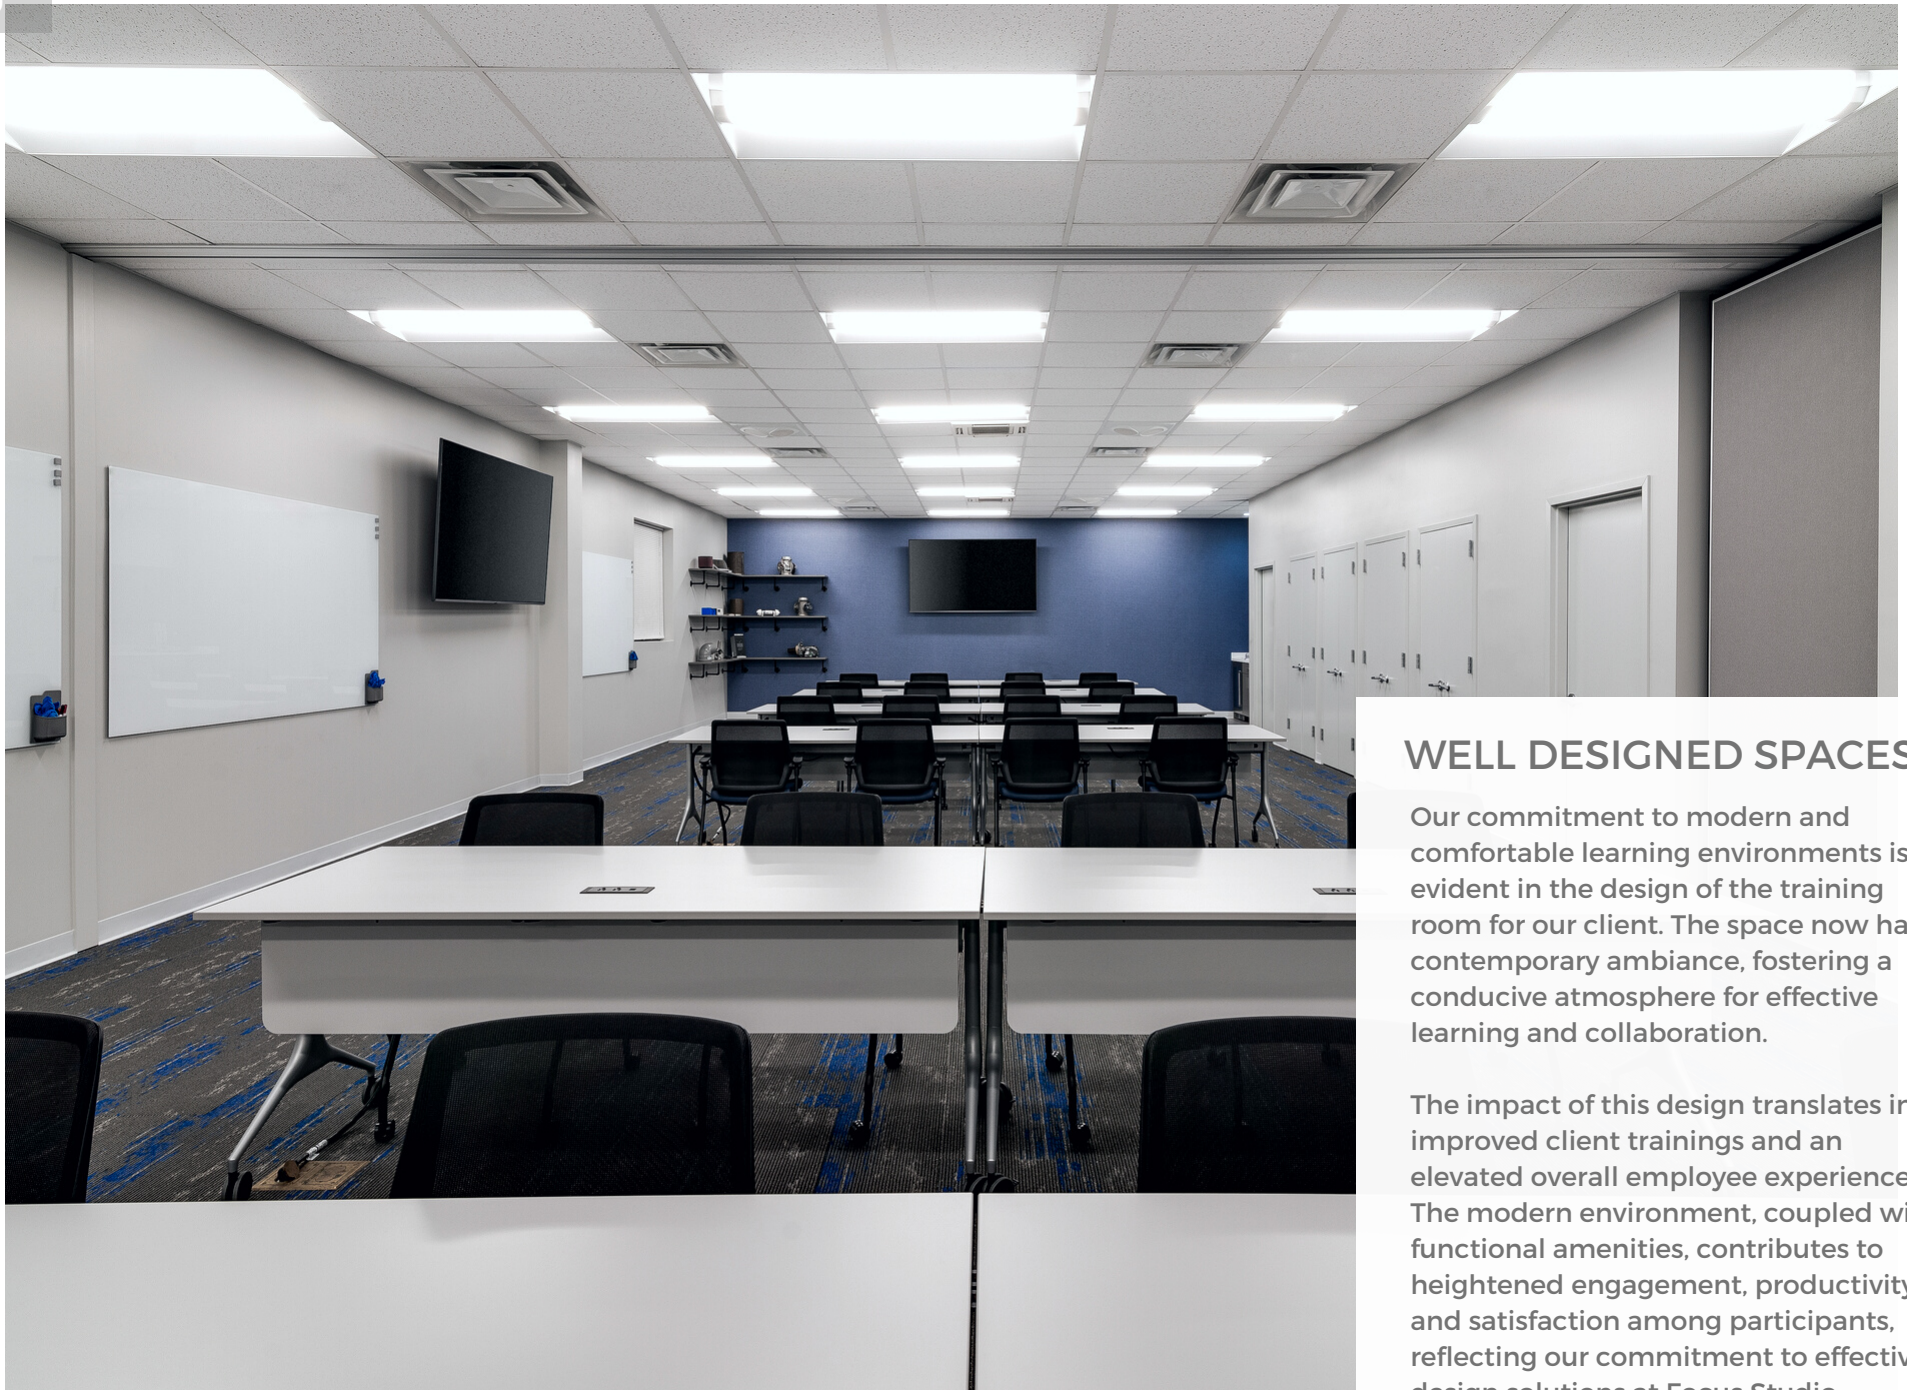

EMPLOYEE-CENTRIC DESIGN

An integral part of this modern setup is the incorporation of two well-appointed refreshment areas.

These areas not only enhance the aesthetic appeal but also serve a practical purpose, featuring counters, mini fridges, and cabinets for snacks and water.

This thoughtful inclusion caters to the comfort and convenience of participants, ensuring that sustenance is readily available without disrupting the learning flow.

WELL DESIGNED SPACES

Our commitment to modern and comfortable learning environments is evident in the design of the training room for our client. The space now has a contemporary ambiance, fostering a conducive atmosphere for effective learning and collaboration.

The impact of this design translates into improved client trainings and an elevated overall employee experience. The modern environment, coupled with functional amenities, contributes to heightened engagement, productivity, and satisfaction among participants, reflecting our commitment to effective design solutions at Focus Studio.
